

## GObugtest: risk assessment with external perspectives

### AT A GLANCE

#### CHALLENGE

- Protecting sensitive customer data
- Outsourced IT systems, various domains
- No external security checks to date

#### BENEFITS

- Time and cost-effective testing
- Excellent report with specific improvement recommendations
- Assurance that outsourcing partner fulfills their obligations very well
- Communication tool to inform risk assessment with BoD

**“The annual GObugtest is an integral part of our security measures to effectively manage cyber threats”.**

### ABOUT MAESTRANI

Maestrani Schweizer Schokoladen AG is a traditional Swiss family business that has been producing and marketing high-quality chocolate products (Minor, Munz, private label) in Flawil since 1852. With over 150 employees, Maestrani focuses on innovation, quality and the use of sustainably sourced cocoa beans.

### CHALLENGES

Maestrani strives to continuously improve the security and performance of its website and online store. Existing security measures include phishing awareness training and a crisis management response process in the event of an attack. To provide an objective external review of its outsourced IT systems, Maestrani opted for a GObugtest, in which external security experts checked the web store and web domains for potential vulnerabilities.

### BENEFITS

#### Simple and straightforward

The bugtest was quick and easy to implement, with no extensive preparation or effort on Maestrani's part.

#### Detailed and action-oriented report

The detailed bugtest report offers clear recommendations for action and at the same time confirms the competence of the outsourcing partner.

#### Communication with the Board of Directors (BoD)

The report serves as an effective communication tool for risk assessment and promotes the integration of external insights into Maestrani's security strategy and risk management process.

#### Greater protection of customer data

Regular security checks enable the protection of customer data to be optimized on an ongoing basis, contributing to a trustworthy and secure shopping experience.
